

INDUSTRY & ELECTRONICS

2018

The  art of enclosing electronics

EXPERIENCE

Atos designs, develops and manufactures in France, at its factories at Glos (Normandy) and Carros (Côte d'Azur), casing equipment for the electronics industry: cabinets, cases, racks, systems, fine sheet metal equipment, etc.

For more than 40 years, ATOS has been working to provide an indoor or outdoor enclosure solution for every requirement in the electronics industry: standard, adapted standard, customized or production as per drawings.

With its strong **customer focus**, ATOS serves the telecommunications, transportation (aerospace, railway, aviation, navy, etc.), electronics and IT markets (OEM and datacenters: HPC, production, hosting, etc.), in both the civil and defence fields.

Glos establishment - Normandy

Carros factory - Côte d'Azur

Our cooling systems contribute to saving energy and improving the carbon footprint of computer fleets.

has developed, in addition to its original sheet metal and modular mechanics businesses, a range of services enabling it to offer its customers

A RANGE OF SKILLS

ADAPTED TO THE ELECTRONICS MARKET:

DESIGN AND DEVELOPMENT

- Two Design Offices design standard, adapted or "custom-made" products.
- Mechanical, electrical or thermal dimensioning: Power distribution,
- Air cooling, water cooling systems up to 45 kW per cabinet.
- Solutions architecture: integration, energy, cooling, supervision.
- Mechanical and sheet metal design in 3D CAD.
- Electrical design: preparation of diagrams.

PROTOTYPING

A focused and responsive organisation builds prototypes and guarantees their subsequent industrialisation.

TESTS

Whether using its internal resources or working with partner laboratories, Atos is able to plan and carry out an appropriate environmental qualification for electronics, telecommunications and IT projects: Loaded cabinet transport (up to 1200 kg), IP or IK tests, thermal tests with air or water cooling, supervision.

MANUFACTURING

Manufacturing in France enables us to guarantee regular and constant quality, subject to European and French standards. Our racks and cooling systems are manufactured entirely in our cutting, bending, welding, painting and assembly workshops.

PRE-FITTING, INTEGRATION

Supply of AC and DC UPS, power distribution, integration of hardware or sub-assemblies (power supplies, backplanes, boards, etc.) are additional activities available in both factories for optimum manufacturing efficiency. In this manner, DataCenter racks can be entirely fitted with prewired PDUs, with optimised and factory-tested cable volumes. Similarly, a supervision system can be configured in the cabinet before shipment.

PROJECT MANAGEMENT, ROLL-OUT AND LOGISTICS

Specific personnel monitor the roll-out of projects and stock control in each site, in direct contact with the customers. With its own fleet and network of carrier partners, Atos controls the entire logistics chain up to delivery on site under roll-out and the complete installation of cabinets in hot or cold aisles with their cooling systems.

DISTRIBUTION

To remain in close contact with all users, a range of reserved Atos products detailed in a separate catalogue can be found in branches of main general or specialist distributors.

A sales and marketing team focused on your needs.

19" CABINETS FOR SEVERE ENVIRONMENTS

- IP 21 TO IP 55
- EMC AND HF ATTENUATION
- AIR-CONDITIONING

The OPTIMALE cabinet has been designed as a rational solution for the protection of 19" equipment in severe indoor environments - damp and/or dusty premises, medium and high electromagnetic constraints, in both immunity and emission.

AVAILABILITY

Height	600-wide rack			800-wide rack

IP55 INDOOR CASE

The IP55 sealed case is designed especially to meet the need for electrical installation solutions requiring good sealing protection.

The case is offered in painted steel for indoor applications but can also be produced in painted aluminium or stainless steel upon request for more severe environmental requirements.

OUTDOOR CABINETS AND CASES

The ATOS cabinets and cases in the OUTDOOR range are designed specifically to withstand the most severe environmental requirements. The case provides full protection against very bad weather (rain and snow) through its high IP55 sealing level and its machined diamond-shaped roof.

The cases are offered in single or double skin versions. The double skin technology protects against the sun's rays and allows the outside walls to be changed around in the event of vandalism or an accident.

TABLE CASE

The AMPLITUDE 19" case is a solution to suit applications needing little space (up to 12U) and is easy to transport. It exists with or without a front door.

It is designed (robust steel construction, epoxy-polyester powder coating) to protect equipment and aesthetically will integrate seamlessly into all types of room.

AVAILABILITY

Height	Cabinet 532 wide, 500 deep

FIXED OR SWIVEL WALL CASE

The OPTIMA 19" wall case has been designed especially to meet the wishes of telephone and local network installers:

- Robust welded steel construction, with epoxy-polyester powder coating
- Easy to customise aesthetics
- Easy wiring: minimum distance between wall and cable I/O, 19" fixings on wall panel
- Possibility of standard ventilation
- Possibility of housing metric equipment.

OPTIMA is upgradeable: it can house equipment compliant with metric and ETSI standards (IEC 917, ETS 300-119) by substituting metric uprights for its 19" uprights.

19" CHASSIS FOR NON-19" EQUIPMENT

ATLAS is a 19" drawer with handles that can incorporate non-standard components: batteries, power supplies, measuring cabinets, etc.

ATLAS can withstand heavy loads:

- Zinc-plated steel chassis,
- Front panel in 4 mm thick aluminium,
- Slides with high load capacity.

Its design makes it highly modular:

- Possible height adjustments of the front panel,
- Multiple positions of the bottom or rear panel,
- Possibility of fitting slides and locking devices.

RACK WIDTH 600

Composition:

1 structure comprising:

- 2 white zinc-plated steel frames,
- 2 front outside uprights in painted steel,
- 2 rear outside uprights in painted steel,
- 4 feet with black polyamide baseplate,
- 2 panels (lower and upper) at the front.

Options:

Roofs, doors, rear panels, rebates, inside uprights, paint colours.

Accessories:

19" adaptation, inside uprights, earthing kit, etc.

INTERNAL UPRIGHTS

Characteristics:

- Fit onto all Évolution cabinet types,
- Adjustable in depth at 20 mm increments.
- Rebates can be adapted for 19" front panels,
- The flanges have punch holes every half-unit, thus facilitating the fitting of collars for cable bundles

Composition:

- Choice of 2 or 4 uprights + 1 set of fasteners.
- Material: galvanised steel.

See drawings and dimensions page 36

19" REBATES FOR INSIDE UPRIGHTS \square 8.4

Characteristics:

- Adapt to all types of Evolution cabinet 600, 800, 900 and 1000 deep,
- Used to set back the support plane of front panels of baskets or chassis (version A, B, C and D),
- Unless specified on the order, fitting in version C (as per standards DIN 41494, NFC 20 151 and IEC 297).

Composition:

- 2 rebates + fasteners.
- Material: galvanised steel.

19" REBATES FOR OUTSIDE UPRIGHTS \square 8.4 MM

Characteristics:

- Adapt to all types of Evolution cabinet 600 to 1000 deep,
- Used for a position at -20 or -60 of the support plane of front panels of baskets or chassis,
- Can also be fitted on rear uprights.

Composition:

- 2 rebates + fasteners.
- Material: galvanised steel.

REBATES 19" SERVER FOR \square 9.5

Some servers can be incorporated with telescopic slider kits supplied by the manufacturer, kits fitting on 19" rebates, punched to 9.5 mm square.

- The 19" rebates for server cabinets are adapted specially for the fitting of telescopic runners fitted with screw-in or hook-on adaptors.
- They are available in full or partial height to mix rackable servers and towers. They stand on top of each other without losing working height.

Composition:

- 2 rebates + fasteners.
- Material: galvanised steel.

RACK WIDTH 800

Characteristics:

This model exists in 4 depths and 4 heights, 36U, 42U, 45U, 47U.

It offers 685 mm passage between outside uprights.

Composition:

1 structure comprising:

- 2 white zinc-plated steel frames,
- 2 front outside uprights in painted steel,
- 2 rear outside uprights in painted steel,
- 4 adjustable feet with black polyamide baseplate.
- 2 panels (lower and upper) at the front.

Options:

Roofs, doors, rear panels, rebates, inside uprights, paint colours.

Accessories:

19" adaptation, inside uprights, earthing kit, etc.

ADAPTATIONS 19" TOTAL HEIGHT

Characteristics:

- Adapt to cabinet 800 wide, 600, 800, 900 or 1000 deep.
- Fixing 19" on front panel possible.
- Different versions are available:
 - 19" centred or off-centre (give the side when ordering),
 - with or without cable cut-outs in the front panel,
 - with swivel bezels.
- Comprise 2 or 4 inside uprights and 2 inside upright rebates Ø 8.4.

1005816

• CENTRED 19" UPRIGHT KITS, PARTIAL HEIGHT ▮ 8,4

Characteristics:

- Assembly parts in galvanised steel, rebates and uprights in zinc-plated steel, with fasteners.
- Fit on to the 800-wide évolution cabinets, fitted with inside uprights with 685 clearance.
- 3 possible types of assembly according to cabinet position and number of uprights.
- These kits are adjustable for depth at 20 mm increments. To be stated when ordering.
- The type C assembly can be adjusted for height at half-unit increments. To be stated when ordering.
- The front uprights are fitted with rebates to fix 19" front fascias: state the assembly version.
- Flanges punched at half-unit increments for cable fixing and runs.

SOLID, GLASS AND PERFORATED FRONT DOORS

Characteristics:

- Unhingeable without mechanical intervention (in open position),
- Central closing by wing bolt, with key lock,
- Supplied with bonding strap W.330 mm.

Material:

- Solid door: Painted steel.
- Glazed door: 1 frame in painted steel.
1 lightly smoked safety glass
- Perforated door: 1 painted steel frame + metal sheet perforated 64% for airflow.
Single and double leaf versions.

Option: Paint colour.

Delivery: Pre-assembled or fitted, if stated when ordering.

FRONT GLASS DOOR

Characteristics:

- Right- or left-hand hinge,
- 1 wing bolt, with key lock 13 to 22 U,
- 2 wing bolts, with key lock 27 to 47 U,
- A rebate plane at -40, 60 or 80 mm is necessary to fit the glass door.

Composition:

- 1 clear safety glass door 6 mm thick,
- 2 hinges in matt black moulded Zamak,
- 1 or 2 doorstops depending on height,
- 1 or 2 wing bolts depending on height,
- 1 set of fasteners.

Mini-cabinets and extensions

Part numbers in bold:
available from stock.

Normal:

ask your salesperson for lead times.

The EVOLUTION mini-cabinet offers reduced outside dimensions (560 mm wide) for the inside dimensions of EVOLUTION cabinets.

Composition:

- 1 cabinet rack comprising:
 - 2 frames.
 - 4 outside uprights.
 - 4 adjustable feet with polyamide baseplate.
- 1 solid screw-in roof.
- 2 side panels, closed by with 1/4 turn system.
- 4 EVOLUTION inside uprights and 2 assembled rebates on front uprights.
- Depending on version:
 - A.** No front door, but vertical and horizontal bezels on front panel.
 - B.** 1 solid painted steel front door with key lock.
This door can be removed easily without tools and is fitted with a dust seal.
 - C.** 1 front door with 6 mm smoked safety glass with key lock and dust seal (non-hingeable).

Special features:

The top and bottom crossbars are perforated or solid.

The mini-cabinets are fitted as follows as standard:

- Front: Perforated crossbar at bottom. Solid crossbar at top.
- Rear: Solid crossbar at bottom. Perforated crossbar at top.

This composition can be modified if stated when ordering.

A perforated crossbar can be installed as an option, so that a customised panel, filter drawer or ventilation drawer can be fitted whilst keeping the full height of the cabinet for fitting a chassis or subracks.

Equipment:

The EVOLUTION mini-cabinet can accommodate a solid or perforated bottom blanking plate, a swivel rear door with key lock, solid or perforated for ventilation, full or reduced height. In this case, a rear plate can be fitted as a cable passage.

The inside uprights can be adjusted in 20 mm increments depthwise.

Standard finishes:

- Dark grey textured epoxy polyester powder, RAL 7015 for the rack.
- Light grey textured epoxy polyester powder, RAL 7035 for the trim.
- White zinc-coating for the internal structure.

When the mini-cabinet has a door, when not stated otherwise on the order, this door is fitted with right-hand hinging.

The extension is identical to the mini-cabinet, without side panels and with coupling kit. NB: Fitting coupled mini-cabinets makes it impossible to remove the roofs. Consult us for removable roofs.

Mini-cabinet blanking plate

FULL-HEIGHT REAR DOOR

Painted steel 12/10th door, with hinges that can be removed without tools, fitted with a dust seal, key lock and earthing stud M6.

In solid version, state the opening direction.
In perforated version, the hinges are on the left.

Supply: 1 part with seal and necessary fasteners.

Cabinet height	Solid door	Perforated door
12 U	4000280	4000285

REDUCED-HEIGHT REAR DOOR

Painted steel 12/10th door, with hinges that can be removed without tools, fitted with a dust seal, key lock and earthing stud M6.
Painted steel 15/10th rear cross bar (1U size).

In solid version, state the opening direction.
In perforated version, the hinges are on the left.
Door fitted at top or bottom, to be specified when ordering.

Supply: 1 part with seal and necessary fasteners.

Cabinet height	Door height	Solid door	Perforated door

Rear plate 3U **4000300**

REAR PLATE 3U

Rear aluminium 25/10th plate with necessary fasteners.
White alodine finish.

FAN PLATE 3U

Painted steel 15/10th plate, fitted with three wired fans, finger guards, power cord and necessary fasteners.
Air flow: 450 m³/h. Voltage: 220 V, 50 Hz.

Plate 3 fans	6000361
--------------	----------------

BOTTOM BLANKING PLATE

Zinc-plated steel 20/10th.
For mini-cabinets D500: In one part, with fasteners.
For mini-cabinets D600 and D800: In two parts, with fasteners.
Two fans can be fixed to the perforated models (four in depth 800).

Depth	D.500	D.600	D.800
Solid	4000301	4000302	4000303
Perforated	4000304	4000305	4000306

Mini-cabinet accessories

PERFORATED CROSSBAR

One of four crossbars (solid or perforated) in the standard mini-cabinet can be replaced by a perforated crossbar. This crossbar can accommodate a customised panel, filter drawer or ventilation drawer.

State the fitting position in the mini-cabinet description when ordering.

Perforated crossbar	4000309
---------------------	---------

CUSTOMISED PANEL

Buttons, indicator lamps, screen printing, etc. can all be installed on the outside of the mini-cabinet whilst maintaining a standard casing. Composition: 1 part in aluminium 40/10th with fasteners.

Finish: White alodine.

Factory customisation possible, please ask us.

Customised panel	4000310
------------------	---------

FILTER DRAWER

Is mounted on a mini-cabinet fitted with perforated crossbar at the bottom (front or rear).

Composition: 1 assembled drawer with 1 filter, 1 partial bottom blanking plate (in D600 and D800 only).

VENTILATION DRAWER

Is mounted on a mini-cabinet fitted with perforated crossbar at the bottom (front or rear).

Air flow: 468 m³/h Voltage: 220 V, 50 Hz.

Composition: 1 drawer, 1 filter, 4 fans, 1 partial blanking plate (D.600 and D.800 only), 1 power cord.

	Filter drawer	Ventilation drawer
D.500	4000311	4000314
D.600	4000312	4000315
D.800	4000313	4000316
Spare filter	6000362	6000362

CASTOR KIT

Is mounted instead of adjustable feet delivered as standard.

Maximum load: 150 kg.

Composition: 4 castors including 2 that block.

Castor kit	4000307
------------	---------

EYEBOLTS

Four eyebolts can be fitted with reworking of four holes in the standard roof.

This can be carried out in the factory stating, when ordering, the cabinets to be fitted with this.

Composition: 4 parts with fasteners

Eyebolts	4000308
----------	---------

SPECIFIC KITS

Tamperproof kit for side panels and roof	4001285
Kit for mini-cabinet wall fixing	4001286

RUNNERS

Characteristics:

- Adapt to all types of Évolution cabinet D.600, 800 and 1000 fitted with two pairs of inside uprights,
 - Can be fitted every 1/2 unit,
- Material: galvanised steel.
Delivery: 1 pair + fasteners for locking into position.

Quick hanging rails

Position adjustable for depth,

Length	Permissible load	Support	Slide
370	60 kg/pair.	+ 2 mm	4000372*
470		0	1003346
670	80 kg/pair.	+2 mm	1002554 1005817

* Runner adapted to the mini-cabinet D.500.

Adjustable runners

- Dimensions: 1 U,
- Accessible from the side for easy adjustment and perfect alignment of baskets by eccentrics (± 2.5 mm),

Length	Load	Slide
370	60 kg/pair.	4000371*
470		1002556
670	80 kg/pair.	1006335

* Runner adapted to the mini-cabinet D.500.

SIDE GUIDES

Characteristics:

Adapt initially or subsequently to adjustable runners and ensure easy installation of frequently-handled baskets.
Material: galvanised steel.
Delivery: 1 pair + fasteners.

Side guides	1002557
-------------	----------------

TELESCOPIC RUNNERS WITH ADAPTERS

Characteristics:

- Adapt to all types of Évolution cabinet fitted with two pairs of inside uprights,
 - Can be fitted every 1/2 units, with adjustment by eccentrics (± 2.5 mm),
 - Locking and disconnecting in open position without mechanical intervention,
- Range of movement: 356 mm.
Material: white zinc-plated steel.
Permissible load: 45 kg/per pair,
Delivery: 1 pair + fasteners.

Telescopic runner with adapters	1002595
---------------------------------	----------------

See drawings and dimensions page 36.

FIXED SHELVES

Characteristics:

- Positioned every 1/2 unit,
- Stackable every unit,
- Painted steel shelves,
- Delivery 1 part + fasteners.

Fan fixing dimension

			60 kg		1002887

FIXED SHELVES FOR TOWER SERVERS

Fixed shelves for a tower are especially suitable for servers.

- Large surface area: 690 mm deep x 480 or 680 wide
- Very high load capacity: Up to 150 kg.
- They can be removed from the inside, even if the cabinets are slotted together.
- They are designed to accommodate two PVC trunkings at the rear:
 - 1 for strong currents
 - 1 for weak currents

	L.485 mm	L.685 mm
Fixed shelf with fixing	1006243 *	1006244 *
Set of 2 PVC trunkings 42 x 30 mm	1006245	1006246

* These shelves provide maximum aperture but are not compatible with fitting rebates. In this case, see heavy-duty shelf W.480 x D.690 below.

HEAVY-DUTY SHELF W.480 X D.690

- High load capacity: up to 150 kg.
- Compatible with quick fit in server cabinets, with or without rebates (rackable or tower version).
- In steel painted RAL 7035.
- Compatible with quick fit of rebates in version A (see p.17).

Heavy-duty shelf	1006555
------------------	----------------

TELESCOPIC SHELVES

Characteristics:

- Positioned every 1/2 unit,
- Telescopic runners with ball bearings,
- Steel shelves painted, supplied with fasteners,
- Delivery: pre-assembled.

FOR UPRIGHTS IN 19" POSITION, SHELF 489.5 MM WIDE

Assembly	Model	Depth	Load	Runner stroke	Part no.
Quick	Perforated	450 mm	30 kg	330	1003348 °

Power board and PDU 136
Ventilation control, thermostats and heating elements 139

SWIVEL FRAME CABINET

General characteristics:

As an addition to the fixed 19" cabinets, ATOS has developed a cabinet version that incorporates a swivel frame compliant with the 19" standard.

The rear equipment wiring area can be reached from the front of the cabinet with this solution.

A handle makes it easy to open the frame to its maximum opening angle of 120°, whilst maintaining 40 mm distance between the front face of equipment and the cabinet structure

Technical characteristics:

The swivel frame is in 2 mm-thick galvanised steel assembled with rivets and ensuring a permitted load of **150 kg**.

The 19" equipment must meet standards EIA 310-3, IEC 60297 and DIN 41494 standard 19", with a maximum depth of 420 mm. It is mandatory to fix equipment to the frame.

Composition:

- 1 structure comprising:
 - 2 white zinc-plated steel frames.
 - 4 identical outside uprights in painted steel,
 - 2 cable support CP
 - 2 panels (lower and upper) at the front
 - 12 corner reinforcement gussets
- 1 fixed closing panel mounted on the rear section.
- 2 side panels
- 1 front door with sight glass 800 mm wide (opening direction to be stated when ordering).
- 1 perforated roof.
- 4 eyebolts
- 1 floor fixing kit.
- 1 riveted and screwed swivel frame in galvanised steel Z275 fitted with 2 crossbars and 2 inside uprights 40U as per standards CEA-310^E and IEC-60297.

Structure working height	Swivel frame working height	Dimensions	Permitted load
		W800 x D800	
42 U	40 U	1011401	150 kg

The swivel frame is fitted with a left-hand opening as standard. Please contact us for a right-hand opening.

The drawings for the swivel frame cabinet can be found on the next page.

Wall fixing kit	1011402
-----------------	----------------

The cabinet structure must
WITHOUT FAIL
be fixed to the floor.
A wall support
is strongly advisable.

SETBACK OF INSIDE UPRIGHTS

To avoid any ambiguity in the inside upright positions in an évolution, basic or server cabinet, the upright setbacks must be set using values M1, M2, M3, etc. corresponding to 1 pair, 2 pairs, 3 pairs, etc. of inside uprights.

The dimensions designate the distance between the front of the rear outside uprights and the front of the inside upright (see diagrams). These dimensions only designate the inside upright positions.

The default values used when there are no special indications are:

Version	Evolution standard cabinet			"Rackable" mounting server cabinet Depth 900 and 1000		"Tower" mounting server cabinet Depth 900 and 1000	
Number of uprights	1 pair	2 pairs	3 pairs	2 pairs	3 pairs	2 pairs	3 pairs
Position of uprights	M1 = 20	M1 = 20	M1 = 20	M1 = 40	M1 = 40	M1 = 20	M1 = 20
		M2 = 479	M2 = 479	M2 = 659	M2 = 499	M2 = 519	M2 = 419
			M3 = 679		M3 = 659		M3 = 519
Front rebates	Version C	Version C	Version C				
Rear rebates		Version C	Version C				

POSITION OF THE REBATES

In Standard version, the position of rebates on these uprights must be described by the mounting in version A, B, C or D.

Rebate positions are mandatory in Server version.

Except for special cases,

- The front inside uprights (corresponding to M1) always point with the "squares" facing backwards.
- The other pairs of uprights (intermediary and rear M2, M3) always point with the squares facing forwards.
- This means, for example, that the version A rebates point forwards if they are mounted on front uprights and point backwards if they are mounted on rear or intermediary uprights.

TOWER OR RACKABLE MOUNTING

To fix equipment to 19" rebates whilst laying these on runners, it is important to find out the distance between the bottom of this equipment and the bottom of its front face, with standardised height $(n \times U) - 0.81$.

Standard runners are provided for different "A" bottom/ rear face bottom distances:

1002554: A = 2

1003346: A = 0, the 2 mm thickness of the runner goes into the unit located below.

1002556: A adjustable from 5 to 0, but when $A < 2$, the 2 mm thickness of the runner goes into the unit located below.

For the shelves, this gives:

1002567: A adjustable from 12.3 to 17.3. This shelf has a 12 mm fold at the front.

1002568: same as 1002567

1003020: A = 3.5. This shelf has a 10 mm fold at the front therefore this fold will take up 6.5 mm space in the unit below.

1002965: A = 3.5. This shelf has a 12 mm fold at the front therefore this fold will take up 8.5 mm space in the unit below. 1002888/1002885: A = 3.5, the reinforcement located under the shelf will take up 8.5 mm space in the unit below.

It is therefore important to identify the distance "A" from equipment to choose from our range of accessories.

Item	Model	Dimensions	Part no.
A	Keyboard-mouse shelf		1006554
B	Adjustable fixed shelf	Depth 410 mm	1002567 - 1002568 - 1002886
C	Tower fixed shelf	Depth 690 mm	1006243
D	Single runner kit	Width 670 mm	1005817
E	Runner kit	Width 470 mm	1002554
	Fixed shelves		1003020 - 1002888 - 1002965 - 1002885
F	Tower shelf		1006247
G	Telescopic shelves	Depth 410 mm	1002596 - 1002597
H	Telescopic shelf	Depth 450 mm	1003348

SIZES AND MOUNTING POSITIONS IN D.600

NB:

The castor model varies the height of a cabinet:

- on semi-flush mounted castors = $H + 52.5$ mm
- on external castors = $H + 82$ mm.

The OPTIMALE cabinet has been designed as a rational solution for the protection of 19" equipment in severe indoor environments - damp and/or dusty premises, medium and high electromagnetic constraints, in both immunity and emission.

CONSTRUCTION

- Galvanised steel Z275 riveted and screwed structure,
- Clipped EPDM gaskets with steel frame, with tin-plated copper-clad steel metal mesh for the EMC and HF versions, for the doors and panels,
- Closed cell foam panel gaskets for IP55 version panels,
- Robust multipoint closure, with ½ European cylinder, standard key 455E closure,
- Detachable and reversible doors, opening at 180°,
- Panels screwed on crimped nuts (at 125 or 500 mm intervals depending on the version),
- Possibility of reduced or split doors or panels,
- Galvanised steel roofs and flat bottoms, easy to customise,
- Interior uprights according to standard CEA-310E with **wide range of accessories available**,
- Fixed or castor plinth with brake or castors and adjustable feet,
- Standard colour RAL 7035. Other colours on request.

DIMENSIONS AVAILABLE

Heights:	24U, 38U, 42U, 47U
Widths:	600 and 800 mm
Depths:	600, 800 and 1000 mm
Mechanical tests:	EN 61587: levels DL5, SL6
Indices:	IK 10, glazed doors IK 07
Permissible load:	800 kg

VERSION IP 21

Protected against bodies larger than 12 mm (finger, etc.)

Protected against drops of water falling vertically

- Base version that can become an EMC version without dismantling equipment.
- Door end stops, gaskets on panels.
- Possibility of moving to IP 31 by adding grids on air inlets.

Protected against bodies larger than 2.5 mm (tools, etc.)

Protected against drops of water falling vertically

VERSION IP 55

Protection against dust

Protected against water jets in all directions with a nozzle

- Side and rear panels fixed at 500 mm intervals,
- Closed cell neoprene foam panel gaskets,
- Door gaskets in EPDM tube with metal frame, clipped to gutter,
- Ventilation with filter blocks IP 54 or IP 55, in overpressure or extraction,
- Compact air conditioning fitted on side panel, or door, with plenum option for optimised heat dissipation.
- Power:
 - Single-phase, 800 to 1900 W L35L35
 - Three-phase, up to 3800 W.

Outdoor versions can be offered on the standard base for outdoor use. Consult us.

EMC VERSION

- Side and rear panels fixed at 500 mm intervals,
- Roofs and bottoms screwed at 80 mm intervals, without EMC gaskets.
- Ventilation via doors and plates perforated 45% for airflow,
- Cable inlets via waveguides, EMC glands,
- Cable inlets via guillotines (loss of about 5 to 10 dB from 30 MHz to 2 GHz).

The curves represent the minimum, mean and maximum values of attenuations measured at each frequency in all directions (front, side, rear, diagonals, etc.) and as per the two horizontal and vertical polarisations, with the smoothing set to 5% during these measurements. No correction is made for resonance.

ATTENUATION CURVE

HF VERSION

- Side and rear panels fixed at 125 mm intervals,
- Roofs and bottoms screwed at 80 mm intervals, with EMC gaskets,
- Ventilation by doors or roofs/bottoms fitted with honeycomb,

- Cable inlets via waveguides or EMC glands,

ATTENUATION CURVE

Measuring conditions identical to the EMC curve above.

PRECONFIGURATION IP 21

Perforated door

Solid door

The OPTIMALE IP 21 cabinet comprises:

- 1 galvanised steel Z275 riveted and screwed structure,
- 2 panels screwed on crimped nuts (at 500 mm intervals),
- 1 flat roof and 1 flat bottom (see page 48) in galvanised steel,
- 4 inside uprights as per standards CEA-310E and IEC-60297, with marking of units on the 2 front uprights,
- 4 adjustable feet,

and fitted depending on circumstances:

- At the front - with a perforated door.
- At the rear - with a solid door,
- with a perforated door,
- with a glazed door.

Dimensions available:

- Heights 24U, 38U, 42U and 47U
- Widths 600 and 800 mm
- Depths 600, 800 and 1000 mm

CAUTION: This configuration should be supplemented by cable I/O plates, ventilation plates and accessories on page 58 and the next pages.

PASSIVE VENTILATION:

Heat is dissipated by radiation only or by natural convection, in the case of low heat dissipation, or when the equipment can withstand high temperatures. Consult the curve below to estimate the rise in temperature.

1 - BY RADIATION ONLY

The cabinet is fully closed.
The roof or bottom ventilation blanking plates are available for three protection ratings.

Version	IP 40 or EMC	IP 21/31/55	HF
Plate 305 x 315	screw in without gasket	screw in with neoprene gasket	screw in with contact strip
Part no.	6001034	6001035	6001036

For cable passage cut-outs, see page 69.

2 - BY NATURAL CONVECTION:

This occurs via the ventilation openings:

- 305 x 315 mm in roofs and bottoms
- 223 x 223 mm in doors

Air intake through bottom:

Version	IP 20	IP 54	EMC	HF
Door outlet	6001037	6001038	6001039	6001040
Roof outlet	6001041	6001042*	6001043	6001044

For an IP 21 roof outlet, see raised roof for ventilation.

* With dome

Air intake through machined door

Version	IP 20	IP 54	EMC	HF
Door outlet	6001045	6001046	6001047	6001048
Roof outlet	6001049	6001050*	6001051	6001052

For an IP 21 roof outlet, see raised roof for ventilation.

* With dome

Air intake through perforated door

Version	IP 20	IP 54	EMC	HF
Door outlet	6001053	6001054	6001055	6001056

For an IP 21 roof outlet, see raised roof for ventilation.

Air exhaust through raised roof or dome

Raised roof for index IPx1, mounted on small 45 mm columns above the roof of the base cabinet

Dome only, for index IPx4

Version	IP 20	IP 54	EMC	HF
Door intake	6001057	6001058	6001059	6001060
Bottom intake	6001061	6001062	6001063	6001064

Raised roof/dome

Version	P.600	P.800	P.1000

Roof W.800	1009945	1009946	1009947
Dome	6000634		

ACTIVE VENTILATION THROUGH BOTTOMS, ROOFS OR MACHINED DOORS

Active ventilation is necessary when heat dissipation is high or the equipment is temperature-sensitive.

The proposed solutions can ventilate the cabinet vertically, horizontally or can mix air intake and exhaust solutions.

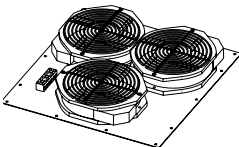

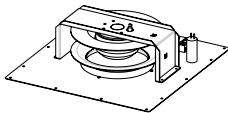

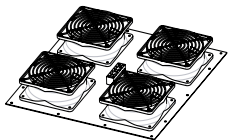

Overpressure solutions protect against dust even when the sealing fails (cable inputs, door not closed properly), but are often cumbersome.

Extraction solutions are normally easier to install.

VENTILATION IN BOTTOM OR ROOF

Set of fans, fitted and wired based on the configuration retained:

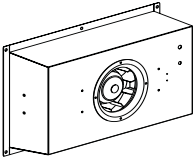

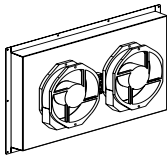

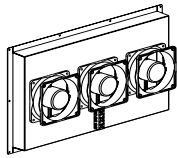

- Extraction, fixed from outside at top of cabinet
- Overpressure, fixed from inside at bottom of cabinet

Typical actual flow rates (guide values according to the protection)			
	3 Fans 150x172	Radial fan	4 Fans 120x120
IP21	800 m³/h	550 m³/h	450 m³/h
IP54	490 m³/h	450 m³/h	Not recommended
EMC	700 m³/h	500 m³/h	400 m³/h
HF	700 m³/h	500 m³/h	400 m³/h

VENTILATION IN MACHINED DOOR

Set of fans, fitted and wired based on the configuration retained:

- Extraction, fixed at top of door, normally on the rear door
- Overpressure, fixed at bottom of door, normally on the front door

Typical actual flow rates (guide values according to the protection)			
	Radial fan	2 Fans 150x172	3 Fans 120x120
IP21	500 m³/h	480 m³/h	300 m³/h
IP54	460 m³/h	360 m³/h	Not recommended
EMC	450 m³/h	450 m³/h	240 m³/h
HF	450 m³/h	450 m³/h	240 m³/h

PRECONFIGURATIONS:

AIR INTAKE THROUGH THE BOTTOM, EXHAUST THROUGH THE ROOF

Extraction

Overpressure

* The IP21 versions need a raised roof installed (see next page).

⚠ The IP54 versions are fitted with a ventilation dome (cabinet height + 70 mm).

Ventilation	Type of mounting	Model	Protection

AIR-CONDITIONING UNIT CHARACTERISTICS

The electrical cabinet air-conditioning unit is a simple and efficient method of dealing with cooling problems in control and power cabinets.

Their robustness and autonomous regulation controls the operation of your electrical and electronic components perfectly.

Must be used in cabinet IP 5x. Please consult us about using it in the EMC or HF cabinet.

Standard equipment:

- Hermetically-sealed piston compressor
- Calibrated capillary expansion
- High-efficiency fans fitted with internal protection
- Condenser and copper-clad evaporator aluminium fins
- Aluminium air filter
- Electronic thermostat with digital display and high and low temperature alarms
- Condensate evacuation
- Cabinet sealing gasket supplied
- Bodywork colour grey RAL 7035

Options and variants:

- Different voltages and frequencies from the standard 230 VAC 50 Hz
- Flush-mounted and semi-flush-mounted model
- Different RAL paint from the standard
- Stainless steel cowling
- Anti-corrosion treatment of batteries and pipes
- Heating resistor

HEATING ELEMENTS

- To keep a cabinet from freezing in unheated premises or to prevent condensation.
- Resistors equipped with fans for improved convection.
- Fixed directly to the outside uprights or inside uprights 19", depending on the model.
- Fitted with a 3 x 1 mm² cord, length 2 m with plug.

Part nos.

Heating elements		
80 x 80 x 50/150W	19"/3U/D.85/250W	19"/3U/D.85/600W
6000415	6000416	6000418

PULSED AIR HEATING ELEMENT

- Pulsed air heating element designed to keep the cabinet from freezing in unheated premises or to prevent condensation.
- The fan circulates the air and maintains a steady temperature.
- The built-in thermostat is used to set the desired temperature.
- Mount onto internal or external uprights.

Composition:

- 1 DIN rail,
- 1 resistance + terminals for power supply.
- 1 cord 3 x 1 mm² cord, 2 m long with UTE plug.

Characteristics:

- Supply voltage: AC 220-240 V, 50/60 Hz
- Heating power (50 Hz) for an ambient temperature of +20°C: 550 W
- Heating power (60 Hz) for an ambient temperature of +20°C: 650 W
- Max. start-up current: 13.0 A
- Timed fuse T recommended: 10.0 A
- Air flow rate, free blowing: 45 m³/h
- Temperature controller adjustment range (hysteresis 7 K (±4 K tolerance)): 0 to +60°C
- Weight: approx. 1.1 kg.

Part no.

Pulsed air heating element	6001033
----------------------------	----------------

CONTROL

The control thermostat is used to operate the fans/heating elements as and when necessary. It also saves on power and limits filter clogging.

The alarm thermostat opens the loop when the setpoint is overrun.

THERMOSTATS

Mount onto internal or external uprights.

Composition:

- 1 DIN rail,
- Thermostat + terminals for power supply, in the case of control thermostats, pre-wired to the contact.
- Capacitance switch 10 A at 250 VAC.

Part nos.

Control thermostat		Alarm thermostat	
A) ventilation	B) heater	C) low temp.*	D) high temp.*
6000388	6000389	6000390	6000391

* Dry contact: the circuit is open if the threshold is exceeded.

MECHANICAL MOISTURE SENSOR

- The mechanical moisture sensor is used to control the heating or ventilation of the electrical cabinet to keep the air humidity above the dew point.
- This prevents condensation and corrosion of components.
- Adjustment ranges: 35 to 95% RH

Mounts onto inside or outside uprights.

Composition:

- 1 DIN rail,
- 1 Mechanical moisture sensor

Part no.

Mechanical moisture sensor	6001065
----------------------------	----------------

FIXED PLINTH

- Welded, folded steel belt, 100 mm high, with removable front panel.
- The plinth is fitted with 4 crimped nuts M10 that can accommodate the cabinet's adjustable feet for levelling purposes.
- Black paint RAL 9005

Part nos.

Depth	L.600	L.800
600 mm	1009948	1009951
800 mm	1009949	1009952
1000 mm	1009950	1009953

CASTOR PLINTHS

- Required to move cabinets whether or not loaded.
- In steel painted Black RAL 9005.

Plinth with castors and adjustable feet

Plinth designed for moving the cabinet to its use position. Can be fitted with an outside filter drawer.

Part nos.

Load	L.600			L.800

RAISED FLOOR SUPPORT

To install the cabinets on a raised floor.

- Mounting on 4 adjustable feet in D.600 and D.800 and on 6 in D.1000.
- Height adjustment from 260 to 350 mm.
- Permissible static load: 1000 kg
- Front and rear panel support included.
- Kit with 2 side supports, bracket type, to be ordered separately according to depth.

CABLE PASSAGE WITH HF WAVEGUIDE

- Machined galvanised steel plate Ø 50, to be equipped.
- Brass waveguide, 120 mm long, inside Ø 40 mm, outside 50 mm.
- Brass 90° elbow waveguide, 60 mm long, inside Ø 40 mm, outside 50 mm.

The plate can accommodate glands M50.
Delivered with fasteners.

Part nos.

Model	A - 300 x 65	B - 400 x 100
Machined plate	1011093	1011094
Capacity	3 x Ø 50 + reserve	5 x Ø 50 + reserve

Part nos.

C - Blanking kit for waveguide position	1011095
D - Straight waveguide inside Ø 40mm, W.120 mm + 2 nuts	1011096
E- 90° elbow waveguide inside Ø 40mm, W.60 + 2 nuts	1011499

 Waveguides are recommended for the penetration of fibre optic cables in EMC or HF cabinets.

Inside equipment

INSIDE UPRIGHTS (ADDITIONAL) 19"

- 2275 Galvanised steel uprights.
- These uprights should be positioned outside 19" area and are depth-adjustable at 25 mm increments.

Part nos.

Height	24 U	38 U	42 U	47 U
Pair	1011119	1011120	1011121	1011122

VERTICAL SEALING KIT OUTSIDE 19" AREA

- To blank off the side air passages in an 800-wide cabinet, with or without openings for cable passages,
- The open model can be fitted with brushes, blanking plates (2 cut-outs 2U x 19") or cable guide rings
- In painted steel, delivered per unit, with fasteners,
- Also exists for the W.600 cabinet, set of brushes between inside upright and side panel.

Part nos.

Bezel	24 U	38 U	42 U	47 U
W.800 open	1011097	1011098	1011099	1011100
W.800 solid	1011101	1011102	1011103	1011104
W.600 brushes	1011115	1011116	1011117	1011118

Part nos.

Brushes for cut-out 2U x 19"	1011106
Blanking plate for cable cut-out opening 2U x 19"	1011105
Kit with 4 cable guide rings for bezel	1011272

HORIZONTAL SEALING KIT

Beyond a 100 mm setback of 19" uprights, the horizontal blanking plates seal the air flow at the top and bottom of the cabinet. Delivered with fasteners.

Part nos.

	L.600	L.800
Set of two horizontal sealing plates	1011113	1011114

PANEL LOCKING KIT

The kit comprises 2 galvanised steel brackets that can lock out the panel from inside the cabinet. It is supplied with fasteners for fixing to the rack and explanatory fitting instructions.

Part nos.

	For side panel	For rear panel
Lock-out kit	1011243	1011244

QUICK HOOK-ON RUNNERS

- Adapt to all types of OPTIMALE cabinet D.600, 800 and 1000 fitted with two pairs of inside uprights,
- Can be fitted every 1/2 unit,
- Permissible load: 60 kg/pair.

Material: galvanised steel

Delivery: 1 pair + fasteners for locking into position.

Part nos.

Distance between front and rear uprights	Support 0	Support -2
390 to 540 mm	1010341	1010313
540 to 690 mm	1010340	1010312
690 to 840 mm	1010342	1010311

ADJUSTABLE RUNNERS

- Dimensions: 1 U,
- Accessible from the side for easy adjustment and perfect alignment of baskets by eccentrics (± 2.5 mm).
- Permissible load: 60 kg/pair.

Part nos.

Distance between front and rear uprights	Support 0 to 5 mm
390 to 540 mm	1010317
540 to 690 mm	1010318
690 to 840 mm	1010319

FIXED SHELVES

Characteristics:

- Positioned every 1/2 unit,
- Permissible load: 50 kg
- Stackable every unit,
- Painted steel shelves
- Delivery 1 part + pair of runners + fasteners.

Part nos.

Depth	Distance between front and rear uprights	Quick fit	Adjustable fitting
385	390 to 540 mm	1011129	1011132
535	540 to 690 mm	1011130	1011133
685	690 to 840 mm	1011131	1011134

BRACKET FOR VERTICAL MOUNTING OF SOCKET BOXES

Bracket for vertical mounting of socket boxes.

Fits onto the Cabinet's external uprights.

Allows the vertical fitting of 1 Zero U PDU.

Material: galvanised steel.

Delivery: set of 2 brackets + Cabinet fastenings.

Fully compatible with panels 6000038, 6000039, 6000040 and 6000356 on page 126.

Please consult us for the other models.

Set of 2 fixing brackets	1011111
--------------------------	----------------

DOOR CONTACT SWITCH

To monitor a door's open or closed status, or to control a lighting system.

Contact switch kit:

- 1 contact switch with 2 isolated switches 1 NO + 1 NC
- Fixing parts for OPTIMALE cabinet + fasteners
- Assembly drawing

Part no.

Door contact switch kit	1011109
-------------------------	----------------

STRIPLIGHT 1U 19"

Composition:

- 1 LED panel T5 4W 320 Lumens 4000 K neutral white with On/Off switch.
- Fixing parts 1U 19" + fixing fasteners M6 for square cut-out 8.4 mm and 9.5 mm.
- 1 power cord 230V

Part nos.

Panel + cable 1.50 m + 2P mains plug	1010255
Spare panel	B118624

Wiring kit:

1 contact switch-striplight connecting lead

Part no.

Contact switch-striplight connecting lead	6000720
---	----------------

DOOR STOP KIT

White zinc-plated steel torque link.
Stoppage at 90° and 120°.

Part no.

Door stop kit	1010365
---------------	----------------

EYEBOLTS

Kit of four zinc-plated eyebolts, fitting to the M10 nuts on the roof.

- **Minor load:** Load capacity per eyebolt 250 kg, i.e. 430 kg loaded cabinet with slings 60° off horizontal.
- **Normal load:** Load capacity per eyebolt 750 kg, i.e. cabinet with 800 kg load.

Part nos.

	Minor load	Normal load
Kit with 4 eyebolts	1007807	1011057

Our other accessories

Screw- or clip-in front panels with or without cable guide rings.....	130
Guard, DIN rail and striplights.....	134
Earthing kit, earthing terminal board and fasteners 19".....	135
Power board and PDU.....	136
Ventilation control, thermostats and heating elements	139

References in bold type: available immediately. Normal type: ask your salesperson for lead times.

SWIVEL FRAME STRUCTURE

General characteristics:

As an addition to the fixed IP, EMC or HF structures, ATOS has developed a structure version that incorporates a swivel frame compliant with the 19" standard.

The rear equipment wiring area can be reached from the front of the cabinet with this solution.

A handle makes it easy to open the frame to its maximum opening angle of 120°, whilst maintaining 20 to 50 mm distance as per configuration (see drawings and dimensions, "X" values) between the front face of equipment and the cabinet structure.

The full product can be proposed based on IP21, IP54 or EMC as required.

Technical characteristics:

The swivel frame is in 2 mm-thick galvanised steel assembled with rivets, ensuring a permitted load of 200 kg.

The 19" equipment must meet standards EIA 310-3, IEC 60297 and DIN 41494 standard 19", with a maximum depth of 420 mm. It is mandatory to fix equipment to the frame.

The side cover has two openings 75 x 110 mm fitted with solid removable plates, thereby simplifying the machining of components to be installed.

Components mounted on a machined plate are 55 mm deep at most.

Composition:

- 1 riveted and screwed structure in galvanised steel Z275, pre-fitted with depthwise crossbars and four adjustable feet.
- 1 fixed closing panel mounted on the rear section.
- 1 floor fixing kit
- 1 riveted and screwed swivel frame in galvanised steel Z275 fitted with 2 crossbars and 2 inside uprights as per standards CEA-310E and IEC-60297.

Structure working height	Swivel frame working height	IP structures		EMC structures		Permitted load
		W800 x D600	W800 x D800	W800 x D600	W800 x D800	
38 U	36 U	1011259	1011260	1011265	1011266	200 kg
42 U	40 U	1011261	1011262	1011267	1011268	
47 U	45 U	1011263	1011264	1011269	1011270	

Please contact us for a HF structure.

To finalise your swivel frame cabinet, select your components (roof, bottom, coupling kit, side panels and front doors) in line with dimensional constraints and protection ratings sought (see previous pages).

Supplement your selection with cable I/O plates, ventilation plates and accessories on page 58 and the following pages.

The drawings and dimensions for the swivel frame structure can be found on the next page.

Wall fixing kit	1011271
-----------------	---------

The cabinet structure must **WITHOUT FAIL** be fixed to the floor. A wall support is strongly advisable.

POSITION OF INSIDE CABINET UPRIGHTS - standard mounting

Cabinet depth	Set back of front upright D1	Distance between uprights D2	Set back of rear upright D3
600	75 mm	440 mm	75 mm
800	100 mm	590 mm	100 mm
1000	100 mm	690 mm	200 mm

The position of front and rear uprights can be adjusted in 20 mm increments or continuously.

Inside height	Overall cabinet height	Overall height with roof
24 U	1203 mm	1243 mm
38 U	1825 mm	1865 mm
42 U	2003 mm	2043 mm
47 U	2225 mm	2265 mm

By default, the machined doors are mounted:

- **at the front**, with the perforated panel or the filter at the bottom,
- **at the rear**, with the perforated panel or the filter at the top.

These panels are removable and can be inverted should the door opening direction change

Working height	Overall cabinet height
24 U	1269 mm
38 U	1892 mm
42 U	2069 mm
47 U	2292 mm

INDOOR CASE IP 55

The IP55 sealed case is designed especially to meet the need for electrical installation solutions requiring good sealing protection.

The case is offered in painted steel for indoor applications but can also be produced in painted aluminium or stainless steel upon request for more severe outdoor environmental requirements.

The case on offer for Outdoor applications is single skin with natural convection or optional ventilation kit to limit the temperature rise in the case if the equipment dissipates high power (double skin version, available upon request).

- The outside enclosure and the door are in steel protected by textured, satin-finish polyester epoxy paint RAL 7035 (index IK10).
- Anti-graffiti varnish is offered as an option.
- The inside mechanics are in galvanised steel.
- The cases are fitted with two 19" inside uprights (compliant with standards CEA-310E and IEC-60297) machined in 9.5 mm squares with identification and numbering of U profiles to facilitate integration.
- Possibility of adding two additional uprights.

Composition:

- 1 welded enclosure,
- 1 front door fitted with a bonded sealing gasket and with 2 x 1/4 turn buttons with key lock 455E
- 2 19" inside uprights
- 1 cable I/O plate fitted with 6 membrane grommets.

		4001394	4001424	4001434

* Ventilated by natural convection Fan can be added, see page 88.

By default, the case is fitted with the cable I/O plate below and the front door with right opening (see drawing page 91).

CASE ENCLOSURE

The case enclosure is fully welded, thereby ensuring excellent mechanical strength. The enclosure is welded in our LASER WELDING ROBOT that guarantees excellent sealing quality and a long life.

Reversible enclosure so that cables can enter via the bottom or top of the case.

The rear partition of the case (ref. D) has 4 pressed sections with Ø 10.5 mm holes for fixing the case directly to the wall (4 mm detachment).

It is designed in such a way that the returns on the enclosure sides (ref. A) provided an interface for fixing equipment in 19" format.

The case bottom or roof (ref. C) is fitted with a cut-out to allow a cable I/O on 1 independent plate 100 x 400 mm.

The cable I/O plate is in 3 mm-thick aluminium with anti-corrosion coating.

The base of the case has a machined plate fitted with 6 membrane grommets.

Height	Pair of uprights
6 U	4001412
9 U	4001413
12 U	4001414
15 U	4001415
18 U	4001416

19" INTERNAL UPRIGHTS

The case is delivered pre-fitted with 2 inside uprights as per standards CEA-310E and IEC-60297.

Uprights in galvanised steel thickness 20/10th, adjustable depthwise every 25 mm.

Option: 2 additional uprights.

Position of uprights, see drawing page 91.

SOLID DOOR IP55

- The solid door (index IK10) is made of steel, thickness 15/10th and painted in RAL 7035 (machining on door, please ask your sales rep.).
- It has a closed cell neoprene leaktight seal glued inside the door that guarantees the requested IP protection rating.
- The door is fitted by default with a right-hand opening, but this can be changed quickly on site (in operation) without dismantling or replacing hinges and the 1/4 turn closing system.
- The door is fitted with invisible hinges and can therefore be opened 120°. It is supplied with earthing stud + 6 mm² braid.

GLASS DOOR IP55

- Of similar design to the solid door, the sight glass created in the painted steel is fitted with 4 mm-thick safety glass (index IK08).
- The glass door means that equipment can be seen without problem

VENTILATED DOOR IP54

The ventilated door is made of steel thickness 15/10th painted in RAL 7035, fitted with 2 or 4 G3 filters at the top and bottom. It ensures **natural convection** of the air flow.

Basic equipment for the ventilated doors comprises:

- In 6U, 2 blocks 80 x 80 mm with G3 filter.
- In 9U, 12U and 15U, 2 blocks 120 x 120 mm with G3 filter.
- In 18U, 4 blocks 120 x 120 mm with G3 filter.

DOOR OPTIONS:

DOOR FAN

Installing fans will limit the rise in temperature in the case. The fans can be positioned at the top or bottom of the door depending on the configuration adopted (to be stated when ordering).

- In extraction, fixed at door top (default mounting)
- In overpressure, fixed at door bottom.

Fan dimensions:

- Fan 80x80 for the door of the 6U case.
- Fan 120x120 for the doors of the 9 to 18U cases.

See description and part no. on page 138.

ATOS has a full set of forced ventilation cooling systems (supply voltage, power to be dissipated, Δt air based on the ambient temperature, etc.): please ask us.

CONNECTION TERMINAL BOARD

Essential for fan connection.

Is fixed inside the door.

- Composition:
- 1 metal support
 - 4 mm² terminal board
 - Fixing fasteners.

Connection terminal board	4001601
---------------------------	----------------

SPARE FILTER

Filtering capacity: 88%. Quality class of filtering cartridges as per DIN EN 779: G 3.

Pack of 5 spare filters for block 80x80	B119688
Pack of 5 spare filters for block 120x120	B119689

DOOR STOP

White zinc-plated steel torque link. Automatic stop at 100°.

Door stop	4001601
-----------	----------------

CLOSURE

Basic door equipment comprises a butterfly button with key lock. Various closing solutions are proposed upon request: 7 or 8 mm square, triangle, double bars, slot, etc.

MACHINED PLATES WITH CABLE INLETS

VENTILATED PLATE WITH GROMMETS AND FILTER BLOCKS 80X80, IP 54

Anti-corrosion treated aluminium plate, 3 mm thick, fitted with:

- 6 membrane grommets (4 x Ø 5 to 17 and 2 x Ø 10 to 22)
- 2 blocks 80 x 80 mm with G3 filter.

Option:

2 fans 230 VAC 80x80 + connection terminal board.

Ventilated plate WITHOUT fans	4001603
Ventilated plate WITH fans	4001604

A ventilated plate can only be installed in cases fitted with a ventilated door.

MACHINED PLATE WITH STAGED MEMBRANE GROMMET, IP 55

3 mm plate, anti-corrosion treated, with fitted grommets. Delivered with fasteners.

Model	Capacity	Part no.
400 x 100	14 x Ø 5 to 17 + 6 x Ø 10 to 22 + reserve 100 x 120	1011050

MACHINED PLATE WITH PLIOFIX GROMMET, IP 65

3 mm plate, anti-corrosion treated, with fitted grommets. Delivered with fasteners.

Model	Capacity	Part no.
400 x 100	14 x Ø 4 to 11 + 6 x Ø 4 to 13 + reserve 100 x 120	1011052

MACHINED PLATE WITH KDL FOR PRE-TERMINATED CABLES, IP 54

Galvanised steel plate with 34 x 85 mm cut-outs, for KDL 16-2 or 16-4. Check that your connectors can pass through the cut-out. Delivered with fasteners.

Model	Capacity	Part no.
400 x 100	3 KDL cut-outs	1011092

to be ordered separately:

KDL

Model	Part no.
KDL 16-2	B018805
KDL 16-4	B018537
Blanking plate	1006059

KDL gaskets (bag of 10 gaskets).

Equipment.....	105
Drawings and dimensions	107

GENERAL CHARACTERISTICS

The ATOS cabinet in the OUTDOOR range is designed specifically to withstand the most severe environmental requirements. The Cabinet provides full protection against very bad weather (rain and snow) through its high IP55 sealing level and its machined diamond-shaped roof.

The cabinets are available in single or double skin versions.

The double skin technology protects against the sun's rays and allows the outside walls to be changed around in the event of vandalism or an accident.

An optional ventilation kit is available to limit temperature rises in the cabinet if the equipment dissipates a great deal of power. The front door is fitted with a multi-point closing mechanical handle for added protection against vandalism.

- IK resistance level to mechanical shocks (EN 62262) = IK10.
- Full metal flush-mounted handle.

The outside enclosure, door and roof are aluminium protected by pure polyester powder paint RAL 7035.

Anti-graffiti varnish is offered as an option.

The inside mechanics are in galvanised steel. The cabinets are fitted with four 19" inside uprights (compliant with standards CEA-310E and IEC-60297) machined in 9.5 mm squares with identification and numbering of U profiles to facilitate integration.

The optional plinth is in stainless steel 304L with smooth, pure polyester paint RAL 7035 to combat corrosion. The stainless steel ensures maximum durability even if the paint is damaged during installation.

RESISTANCE TO CORROSION

Resistance to corrosion complies with standard ISO 12944-6, corrosiveness C4, HIGH durability.

Optional anti-graffiti varnish or a second coat of powder can achieve class C5-M or C5-I, always in HIGH durability (> 15 years). This resistance has been confirmed by salt mist tests of 960 hours (C4) and 1920 hours (C5-M).

SCOPE

Energy, Rail, Fibre optics,
Videosurveillance networks, Telecommunications.

TECHNICAL CHARACTERISTICS

The cabinet comprises an outside aluminium structure painted in RAL 7035. It is fitted with reinforced crossbars in galvanised steel. These support the four 19" inside uprights (adjustable to 25 mm intervals) and also ensure the rigidity of the case when being lifted or fixed to the ground in the event of shocks or vibrations.

Permissible load: 300kg.

- Tested for vibrations as per standard EN 60068-2-6 (0.5 mm from 5 to 22 Hz, 0.5 g from 22 to 150 Hz).
- Shock-tested as per standard EN 60068-2-27 (10g 11 ms vertical).

The roof has diamond-shaped machining to allow for water runoff, with over-roof in double skin version.

The cabinet has two doors (front and rear) with multi-point closing lock rod and linkage in stainless steel 304L.

The front door is fitted with an IP55 air intake filter with G4 efficiency. **The rear door must be supplemented by an air exhaust filter or by a set of fans + filter (see Options).**

By default, the doors have a right-hand opening but are available with left-hand opening upon request.

Retractable Zamak handle with interchangeable 1/2 cylinder + lock shield.

Option: Different 1/2 cylinder (standard key 455th)

Cables can pass through two independent plates on the bottom. The cable I/O plates are in 3 mm-thick aluminium with anti-corrosion coating.

In standard version, the case is fitted with:

- 1 full plate mounted on the front.
- 1 machined plate mounted on the rear with pre-installed grommets.

Staged membrane grommets 14 x Ø 5 to 17, 6 x Ø 10 to 22 + reserve 100 x 120.

DIMENSIONS

NB: Clarifications on the dimensions indicated in the table below:

- Overall height = Outside case height without eyebolts or plinth.
- Working height = the area available for 19" equipment plug-ins.
- Upright height = corresponds to the working height of the 19" inside upright.

The first units (1U) at the top and bottom of the upright cannot be used for plug-in equipment but remain available for 19" panels.

● in stock. ▲ to order.

Composition:

- 1 painted aluminium outside enclosure.
- 1 painted aluminium shade screen for the double skin version.
- 2 painted aluminium front/rear doors with inside lining on double skin version.
- 4 19" inside uprights with depthwise crossbars.
- 1 bottom with two cable I/O plates.
- 1 diamond-shaped roof with over-roof in double skin version.

A rear panel version is also available.

See drawings and dimensions page 98.

Cabinet options

PLINTHS

Stainless steel 304L plinth with pure, smooth polyester paint RAL 7035. It is available in 2 versions:

- "Open" version made up of two stringers positioned laterally below the case
- "Closed" version made up of a belt with tamperproof closing plates (front and rear). Plinth height: 150 mm.

Depth	Open	Closed
500 mm	4001377	4001378
600 mm	4001379	4001380
700 mm	4001381	4001382

EYEBOLTS

Kit comprising four stainless steel eyebolts M10 x 28. Extremely strong (Max. working load 700 kg).

Eyebolt kit	4001320
-------------	----------------

DOOR CONTACT SWITCH

For open/closed door contact, automatic lighting or alarm sent to supervision unit.

- 1 position switch (O+C bipolar snap-action contact).
- 1 connection cable.
- 1 fixing fasteners kit.

Door contact switch	4001305
---------------------	----------------

LIGHTING

- 1 LED striplight T5 4W 320 Lumens 4000 K
- 1 fixing part + fasteners.

Striplight	4001304
Contact switch-striplight connecting lead	6000720

VENTILATION

To limit the temperature rise in the case by adding fan(s) IP55 to rear door.

- 1 fan 150 x 172, voltage 230 VAC, flow rate: 100 m³/h or 2 fans 150 x 172, voltage 230 VAC, flow rate: 200 m³/h
- 1 ventilation control thermostat kit.
- 1 fixing and electrical connection kit.

Requires circuit breaker for protection.

IP54 or 24 VDC version on request.

Version	For model 9U		For models 18 to 31U	
	1 fan	2 fans	1 fan	2 fans
Single skin	6000733	6000734	6000591	6000593
Double skin	6000736	6000737	6000738	6000730

AIR EXHAUST FILTER

Filter G4 to be fitted on rear door for natural convection in the event of very low heat dissipation.

Version	For model 9U	For models 18 to 31U
Single skin	4001597	4001327
Double skin	4001599	4001587

HEATING

To keep a case from freezing or to prevent condensation. Resistors equipped with fans for improved convection. Fit directly onto the 19" internal uprights. Fitted with a 3 x 1 mm² cord, length 2 m with plug.

Requires circuit breaker for protection.

Model	Figure	Power	Part no.
80 x 80 x 50	A	150 W	6000415
19"/3U/D.85	B	250 W	6000416
19"/3U/D.85	B	600 W	6000418

THERMOSTATS

Mount onto internal uprights.

- 1 DIN rail,
- Thermostat + terminals for power supply.

Model	Figure	Part no.
Element control thermostat	A	6000389
High temperature alarm thermostat	B	6000391
Low temperature alarm thermostat	C	6000390

POWER BOARD

For the connection and protection of equipment.

- 1 power board.
- 1 circuit breaker 6 A for heating and ventilation.
- 1 circuit breaker 16 A 30 mA.
- 3 connection terminals 16 mm².

Power board	6000721
-------------	---------

Working height	Inside upright height	Single skin overall height	Double skin overall height
H	H1	H2	H3

500 mm	240 mm	540 mm
600 mm	340 mm	640 mm
700 mm	440 mm	740 mm

The OUTDOOR case is designed specifically to withstand the most severe environmental requirements.

Its double skin technology protects against the sun's rays.

The front door is fitted with a multi-point closing system to protect against vandalism.

The outside enclosure, door and roof are aluminium with polyester powder paint. The steel plinth is treated with Korroprimer before a coat of smooth polyester paint RAL 7035 to combat aggressive weather conditions (snow, wind, rain, etc.).

CHARACTERISTICS

Dimensions

- Overall height: 1605 mm (including 200 mm plinth)
- Working height 19" area: 27 U
- Overall width: 700 mm.
- Overall depth: 600 mm.
- Working depth 19" area: 440 mm
- Protection rating: IP 54 (front door IP 53)
- Weight when empty: 68 kg (including 10 kg plinth)

Material and treatment

Linings and internal parts in galvanised steel.

Front door in aluminium, painted with smooth polyester powder RAL 7035, fitted with an air intake filter.

Steel plinth, Korroprimer treatment + smooth powder paint RAL 7035.

I/O cables via case bottom:

The case is pre-fitted with glands for on-site connections.

On the left:

- 3 glands PG36, for cable Ø 18 to 32
- 3 glands PG29, for cable Ø 15 to 25
- 2 glands PG16, for cable Ø 9.5 to 15

On the right:

- 3 glands PG29, for EDF cable Ø 15 to 25
- 4 glands PG21, for cable Ø 13 to 19
- 3 glands PG16, for cable Ø 9.5 to 15
- 2 glands PG11, for cable Ø 5 to 10

Closure

Retractable handle with 1/2 cylinder 455E.

Option: Different 1/2 cylinder

Basic case 27U

4904435

HEATING

To keep a case from freezing or to prevent condensation. Element fitted with a fan for better convection.

Composition:

- 1 element 600 W.
- 1 fan 120 x 120, voltage 220 V, flow rate 108 m³/h
- 1 element ambience thermostat kit
- 1 fixing and electrical connection kit.

⚠ Requires circuit breaker for protection

Heating 600 W option	6903037
----------------------	---------

VENTILATION

To cool the case in periods of extreme heat.

Composition:

- 1 fan 150 x 172, voltage 230 V, flow rate 200 m³/h
- 1 ventilation ambience thermostat kit
- 1 fixing and electrical connection kit.

⚠ Requires circuit breaker for protection

Ventilation option	6903040
--------------------	---------

POWER BOARD

For the connection and protection of equipment.

Composition:

- 1 power board.
- 1 circuit breaker 6 A for heating and ventilation
- 1 circuit breaker 16 A 30 mA
- 3 connection terminals 25 mm²

Power board option	6903043
--------------------	---------

DOOR CONTACT:

For open/closed door contact or to send alarm to supervision unit.

Composition:

- 1 position switch ("O+C bipolar snap-action contact)
- 1 connection cable.
- 1 fixing fasteners kit.

Door contact option	6903044
---------------------	---------

RUNNERS

Composition:

- 1 pair front fixing runners

Runner option	4904437

Single skin

Double skin

By default, the case is fitted with the cable I/O plate below and the front door with right opening (see drawing page 107).

CHARACTERISTICS

The IP55 OUTDOOR sealed case is designed especially to meet the need for electrical installation solutions requiring good protection from the most severe environmental demands (sun, snow, rain, etc.).

The case is available in single or double skin version.

The double skin technology protects against the sun's rays and allows the outside walls to be changed around (WITHOUT TOOLS) in the event of vandalism or an accident.

The outside enclosure and the door are in aluminium protected by pure polyester powder paint RAL 7035 (index IK10).

Anti-graffiti varnish is offered as an option.

The inside mechanics are in galvanised steel.

The cases are fitted with two 19" inside uprights (compliant with standards CEA-310E and IEC-60297) machined in 9.5 mm squares with identification and numbering of U profiles to facilitate integration.

Possibility of adding two additional uprights.

Composition:

- 1 welded aluminium enclosure,
- 1 solid or ventilated front door fitted with a bonded sealing gasket and with 2 x 1/4 turn buttons with key lock 455E.

Various closing solutions are proposed upon request. 7 or 8 mm square, triangle, double bars, slot, etc.

- 2 19" inside uprights
- 1 cable I/O plate fitted with 6 membrane grommets mounted on the bottom of the case.

For double skin version cases (see shade screen kit page 100) :

- 1 front door lining
- 2 painted aluminium side shade screens.
- 1 painted aluminium roof shade screen.

Resistance to corrosion:

Resistance to corrosion complies with standard ISO 12944-6, corrosiveness C4, HIGH durability.

Part nos. single skin case (shade screen see page 100).

Height	Depth	Solid door case	Ventilated door case
9 U	400	4001502	4001512
	500	4001503	4001513
12 U		4001504	4001514

	600	4001506	4001516
18 U		4001507	4001517

* Ventilated by natural convection Fan can be added, see page 107.

SOLID DOOR IP55

- The solid door (index IK10) is made of steel, thickness 15/10th and painted in RAL 7035 (machining on door, please ask your sales rep.).
- It has a closed cell neoprene leaktight seal glued inside the door that guarantees the requested IP protection rating.
- The door is fitted by default with a right-hand opening, but this can be changed quickly on site (in operation) without dismantling or replacing hinges and the 1/4 turn closing system.
- The door is fitted with invisible hinges and can therefore be opened 120°. It is supplied with earthing stud + 6 mm² braid.

VENTILATED DOOR IP54

The ventilated door is made of steel thickness 15/10th painted in RAL 7035, fitted with 2 or 4 G3 filters at the top and bottom. It ensures **natural convection** of the air flow.

Basic equipment for the ventilated doors comprises:

- In 9U, 12U and 15U, 2 blocks 120 x 120 mm with G3 filter.
- In 18U, 4 blocks 120 x 120 mm with G3 filter.

DOOR OPTIONS:

DOOR FAN

Installing fans will limit the rise in temperature in the case.

The fans can be positioned at the top or bottom of the door depending on the configuration adopted. (To be stated when ordering)

- In extraction, fixed at door top. (Default mounting)
- In overpressure, fixed at door bottom.

Fan dimensions 120 x 120 mm.

See description and part no. on page 138.

ATOS has a full set of forced ventilation cooling systems (supply voltage, power to be dissipated, Δt air based on the ambient temperature, etc.): please ask us.

CONNECTION TERMINAL BOARD

Essential for fan connection.

Is fixed inside the door.

- Composition:
- 1 metal support
 - 4 mm² terminal board
 - Fixing fasteners.

Connection terminal board	4001601
---------------------------	----------------

SPARE FILTER

Filtering capacity: 88%. Quality class of filtering cartridges as per DIN EN 779: G 3.

Pack of 5 spare filters for block 120x120	B119689

SHADE SCREEN KIT FOR SINGLE SKIN CASE

Shade screen kits can adapt without additional machining to single skin cases.

Quick and simple to install, the side walls and roof are mounted from the outside of the case without tools.

The kit comprises a machined shade screen, providing natural air convection to ensure protection from the sun's rays.

The kit comprises:

- 1 roof shade screen in aluminium 15/10th painted in RAL 7035.

The shade screen is tilted on the rear of the case to protect it from extremely bad weather (rain and snow).

- 2 side shade screens in aluminium 15/10th painted in RAL 7035.

The side shade screen has keyholes for quick installation and change around.

- 1 solid or ventilated door shade screen in aluminium 15/10th painted in RAL 7035.

The ventilated door shade screen is fitted with an air deflector to manage incoming/exhaust air flows smoothly.

The shade screen kit is proposed fitted to the single skin case or in kit form for on-site installation.

To be stated when ordering, add "KIT" after the part no. (Example: 4001522 KIT)

VENTILATED PLATE WITH GROMMETS AND FILTER BLOCKS 80X80, IP 54

Anti-corrosion treated aluminium plate, 3 mm thick, fitted with:

- 6 membrane grommets (4 x Ø 5 to 17 and 2 x Ø 10 to 22)
- 2 blocks 80 x 80 mm with G3 filter.

Option:

2 fans 230 VAC 80x80 + connection terminal board.

Ventilated plate WITHOUT fans	4001603
Ventilated plate WITH fans	4001604

A ventilated plate can only be installed in cases fitted with a ventilated door.

MACHINED PLATE WITH STAGED MEMBRANE GROMMET, IP 55

3 mm plate, anti-corrosion treated, with fitted grommets. Delivered with fasteners.

Model	Capacity	Part no.
400 x 100	14 x Ø 5 to 17 + 6 x Ø 10 to 22 + reserve 100 x 120	1011050

Other plates, see page 89.

HEATING ELEMENTS

- To keep a cabinet from freezing in unheated premises or to prevent condensation.
- Resistors equipped with fans for improved convection.
- Fixed directly to the outside uprights or inside uprights 19", depending on the model.
- Fitted with a 3 x 1 mm² cord, length 2 m with plug.

Heating elements	19"/3U/D.85/250W	19"/3U/D.85/600W

CASE-CABINET WITHOUT DOOR

Composition:

- 2 sides in 12/10th steel.
- 4 crosspieces in 15/10th steel.
- 4 19" inside uprights in 15/10th steel, adjustable in 15 mm increments.
- 1 removable perforated bottom in 10/10th steel.
- 1 removable solid roof in 10/10th steel.
- 1 removable perforated rear panel in 12/10th steel.
- 1 set of side bezels.
- 4 black natural rubber feet.

Finish:

- Roof, bottom and bezels in colour RAL 7036.
- Sides, rear panel and door in colour RAL 7035.

Case Depth 500:

Height	Without door
6U	4000383
9U	4000387
12U	4000391

Other depths on request.

Dimensions:

Height	Working height	Total height
6U	268.70 mm	361.70 mm
9U	402.05 mm	495.05 mm
12U	535.40 mm	628.40 mm

Depth	PU: Working depth		Ventilation depth
	without door	with door	
500	475 mm	445 mm	282 mm

CASE-CABINET SIGHT GLASS DOOR

Composition:

- 2 sides in 12/10th steel.
- 4 crosspieces in 15/10th steel.
- 4 19" inside uprights in 15/10th steel, adjustable in 15 mm increments.
- 1 removable perforated bottom in 10/10th steel.
- 1 removable solid roof in 10/10th steel.
- 1 removable perforated rear panel in 12/10th steel.
- 1 door with lightly-smoked safety glass inspection window,
- 4 black natural rubber feet.

Finish:

- Roof, bottom and bezels in colour RAL 7036.
- Sides, rear panel and door in colour RAL 7035.

Case Depth 500:

Height	Glass door
6U	4000397
9U	4000401
12U	4000405

Other depths on request.

HOOK-ON RUNNERS

For wall cases D.500, choose the runners for case D.400.

Material: White zinc-plated 15/10th steel.

Delivery: 2 parts + safety fasteners..

OPTIMA II CASE FIXED MODEL

Fixed or swivel wall case, door with inspection window, available in five heights and two depths to match the volume of your networks

Fixed model

- Totally reversible by turning it over,
- Wall fixing by slotted holes,
- Supplied fully assembled with drilling template for wall mounting.

Characteristics:

- Width: 600 mm
- Heights: 6, 9, 12, 15 and 18 U
- Depths: 400 and 500 mm in fixed version
- Weight: see table
- Permissible load: 40 kg

Working height	Overall height	Glass door		Solid door	
		P400	P500	P400	P500
6U	347	4000995	4001000	4001566	4001571

18U	880	4000999	4001004	4001570	4001575

Composition:

- A** 1 steel casing painted light grey RAL 7035, in fixed version (2 in swivel version)
- B** 2 horizontal door trim strips, dark grey RAL 7015
- C** 1 reversible sight glass door with clear safety glass
- D** 4 slotted holes for wall fixing
- E** 2 depth-adjustable 19" uprights at 30 mm increments
- F** 2 cable I/O pre-cut-out areas (4 in swivel version)
- G** 1 key lock 455E
- H** Optional rear panel for fixed model.

REAR PANEL KIT

The fixed case can be fitted with a rear panel if necessary.

Height	6U	9U	12U	15U	18U
Part no.	4001030	4001031	4001032	4001033	4001034

OPTIMA II CASE SWIVEL MODEL

The opening in the swivel section gives direct access to the rear of equipment for optimised cable management.

Swivel model

- Totally reversible by turning it over,
- Swivel model casing can be removed easily
- Wall fixing by slotted holes,
- Supplied fully assembled with drilling template for wall mounting.

Characteristics:

- Width: 600 mm
- Heights: 6, 9, 12, 15 and 18 U
- Depths: 500 (100+400) and 600 (100+500) mm
- Weight: see table
- Permitted load: 2.5 kg/U

The ATLAS chassis are manufactured by ATOS and designed specially to incorporate non-standard components:

- batteries, power supplies, measuring units, etc.

ATLAS can withstand heavy loads:

- Zinc-plated steel chassis,
- Front panel in 4 mm thick aluminium,
- Runners with high load capacity.

Its design makes it highly modular:

- Possible height adjustments of the front panel,
- Multiple positions of the bottom or rear panel,
- Possibility of fitting runners and locking system

CHARACTERISTICS

- Chassis compliant with standards EIA 310-3, IEC 60297 and DIN 41494 standard 19",
- Inside width: 425 mm.
- Heights available from 2 to 12 U.
- Depths: 360, 460 and 563 mm
- Permissible load: 40 kg.
- Supplied in kit form.

CUSTOMISATION:

To embellish your integration, ATOS could customise your front face, rear face or any other component: do not hesitate to ask.

COMPOSITION:

- 1** 1 raw front face protected by a film or colourless oxidised brushed finish
 - Front face BRO+OAI, non-conducting treatment,
 - ask us for all other finishes.
 - Vertical brushing direction (horizontal as option)
 - 2** 2 perforated end shields in white zinc-plated steel over full height.
 - 3** 2 colourless, oxidised aluminium handles.
 - 4** 1 solid bottom in white zinc-plated steel.
 - 5** 1 rear panel in white zinc-plated steel.
- Pack of fasteners.

INDUSTRIALISATION:

To rationalise the series production run, do not hesitate to consult us for the study of an Atlas single-body with built-in or separate rear face.

Similarly, zinc-plated steel can be changed to stainless steel, aluminium or galvanised steel.

SIZES:

Model shown: standard chassis 3U 460 deep

Depths

E (outside)	F (usable)

* Chassis 2 U with latches are delivered without handles.

HANDLES

Composition:
2 colourless + oxidised aluminium parts + fasteners

Height	2 U	3 U
Part nos.	2000607	2000608

SOLID BOTTOM

Composition:
1 bottom white zinc-plated steel 12/10th + fasteners.

Depth	360 mm	460 mm	563 mm
Part nos.	2000610	2000611	2000612

PERFORATED BOTTOM

Characteristics:
- Easy to fit components
- Supplements the ventilation.

Composition:
1 bottom white zinc-plated perforated steel 12/10th + fasteners.

Depth	360 mm	460 mm	563 mm
Part nos.	2000548	2000549	2000550

REAR PANEL

Composition:
1 panel white zinc-plated steel 12/10th + fasteners.

Part nos.	2 U	3 U	4 U	5 U	6 U
	2000601	2000602	2000603	2000604	2000605
	7 U	8 U	9 U	10 U	11 U

			2000712	2000713	2000714

SOLID COVER

Composition:
1 solid cover white zinc-plated steel 10/10th + fasteners.

Depth	360 mm	460 mm	563 mm
Part nos.	2000188	2000189	2000190

PERFORATED COVER

Characteristics:
Protects and allows ventilation (up to 60% ventilation).

Composition:
- 1 perforated cover white zinc-plated steel 10/10th.
- 4 screws M3 + 4 cage nuts M3.

Depth	360 mm	460 mm	563 mm
Part nos.	2000537	2000538	2000539

RUNNER KIT

Telescopic runners with 3 arms, lockable, unpluggable without mechanical intervention.
Mounting on chassis end shields with cage nuts M4.

Composition:

- 2 runners with ball bearings.
- 2 or 4 adaptors depending on cabinet:

Universel 19" (Fig. A)

- 4 adaptors for mounting on 19" uprights (front and rear)

Adjustable (Fig. B1)

- 2 adaptors for ATOS cabinet; the chassis is height-adjustable using eccentrics (± 2.5 mm).

Quick (Fig. B2)

- 2 hook-on adaptors for ATOS cabinet.
- Fasteners.

Length	350 mm	450 mm	550 mm	650 mm
Stroke	400	500	600	700
Load	44 kg	54 kg	60 kg	64 kg

Universel 19" runners				
Cabinet D.600	2000634	2000635	2000636	2000637°
Cabinet D.800	-	-	2000644	2000645

Optimale runners				
Adjustable	2000191	2000192	2000193	2000194
Quick	2000195	2000196	2000197	2000198

Evolution/Basic runners				
Adjustable	2000651	2000557	2000652	2000653*
Quick	2000655	2000656	2000657	2000658*

° This mounting causes the runners to protrude at the rear of the cabinet

* Cannot be fitted to cabinet 600 deep.

B1

B2

SPACER

Characteristics:

- For mounting between end shields.
- Used for cable passage and fixing.

Composition:

- 1 spacer white, zinc-plated steel 12/10th.
- 2 screws M4.
- 2 cage nuts M4.

Spacer	2000541
--------	----------------

CABLE GUIDE

Mounting:

- On the cabinet, with 19" 2U support supplied.
- On the chassis, bracket allowing 0 to 50 mm distance between the cable guide and rear face.

Composition:

- 1 flexible support 46 mm high.
- 2 fixing parts.
- Fasteners.

Cable guide	2000669
-------------	----------------

RUBBER PROFILE REF. 1033

To protect metal sheet edges, max. thickness 15/10th (bottom and rear) after machining. Sold by the metre.

TRAYS

Fixed or telescopic trays allow non 19" format hardware to be fitted.

The perforated models permit rigid fixing of equipment that is strongly advisable on the telescopic models.

The perforations over the entire tray surface ensure perfect airflow circulation.

There are different versions available:

- Solid or perforated
- Fixed or telescopic
- 4- or 2-point fixing
- Height 1/2U, 1U, 2U.
- Colour: RAL 7035 grey or RAL 9005 black.
- Permissible load: 10 to 80 kg.

Fixed
1U

Fixed Shelves with 4-point fixing (front/rear) with fixing fasteners.

Model	Ht.	Permitted load	Depth	Distance between 19" fixings	Colour (RAL)	Part no.

				9005	A123053
				7035	A113054
				9005	A123054

* The 2-point-fixing shelves are supplied without fasteners. See p. 135.

TELESCOPIC LAPTOP TRAY

The telescopic trays are specifically designed to hold laptop PCs or any other non 19" format hardware.

- 2-point fastening to the front of the tray.
- The 400 mm deep 2U plate is fitted with a 400 mm wide and 350 mm deep telescopic tray.
- Telescopic slide allows the tray to pull out by 290 mm.
- Made of painted steel.
- Permissible load: 10kg

RAL 7035 grey

1004003

RAL 9005 black

1204003

KEYBOARD AND MOUSE TRAY

Keyboard and mouse trays are designed to hold a keyboard and a mouse.

- 4-point fastening to the front and rear of the plate.
- 1U plate fitted with a mouse tray sliding sideways.
- Telescopic slide allows the tray to pull out by 330 mm.
- Made of painted steel.

Depth according to model.

Distance between 19" fastenings	Grey RAL 7035	RAL 9005 black
439 to 599 mm	1003335	1203335
599 to 759 mm	1006554	1206554

19" FIXED HOOK-ON RUNNERS FOR CUTTING \square 9.5

The universal hanging fixed rails are used to fit 19" hardware.

- Quick hanging to 9.5 mm square cut-outs on the rear uprights and screwed by cage nut to the front uprights.
- Distance between 19" fastenings: 400 to 800 mm.
- Made from galvanised steel.
- Delivered in kit form.
- Permissible load: 50 kg

19" quick-hanging rails, 400 to 600 mm	1009666
19" quick-hanging rails, 600 to 800 mm	1009703

FIXING FOR RUNNER KIT \square 9.5 CUT-OUT

Plate + M5 screws. Pack of 20

1006249

SCREW-IN SOLID FRONT BLANKING PANELS

As per DIN 41 494 standard. Provided without fastenings (see page 135).

Aluminium front panel:

- Material: Aluminium, thickness 4 mm.
- Finishings:
 - Natural, protected by a plastic film,
 - Brushed, with clear anodising.

To be specified in addition to the reference.

Steel front panel painted RAL 9005 Black or RAL 7035 Grey:

- Material: Steel.
- Finish: Smooth epoxy-polyester powder.

NB:

All these strips can be supplied with additional functions: switches, indicator lights, protective mechanisms, surge protectors, phone closing relays, RJ45 sockets, sub-D, etc. CONTACT US FOR DETAILS.

PDU IEC 320 UNITS WITH CIRCUIT BREAKER

Function:

- Power distribution units with outlets on jacks IEC 320 10 A (C13) or 16 A (C19)
- The Atos PDU range offers numerous possibilities:
- Direct supply to server sockets from the electrical installation, or by secondary units connected to primary units.
- Connection via socket IEC 309 (the mobile socket to be wired is supplied), by bare cable or on terminal board.
- Departure thermal protection, per group of sockets, according to model.
- All models are compatible with vertical mounting ("Zero U" mounting).

Characteristics:

- Very rigid galvanised steel cases.
- Distribution by welded bus or screw-in splitters.
- Very flexible industrial H07 RNF cables.

Composition:

1 zinc-plated steel screen + fastenings.

Model	Part no.
Small 80 x 80 mm	6000722
Standard 120 x 120 mm	6000033

TERMINAL BOARD

For fan connection.

Is fixed to the various chassis components (plan for machining on solid bottom).

Composition: 1 terminal board + fasteners.

Part no.	0000039
----------	---------

POLYCARBONATE WIRING PROTECTION COVER

Protects the wiring on the terminal board.

For compliance with standard NFC 15-100

Composition: 1 cover + fastenings.

Part no.	6000433
----------	---------

HEATING ELEMENTS

- To keep a cabinet from freezing in unheated premises or to prevent condensation.
- Resistors equipped with fans for improved convection.
- Fixed directly to the outside uprights or inside uprights 19", depending on the model.
- Fitted with a 3 x 1 mm² cord, length 2 m with plug.

Heating elements		
80 x 80 x 50/150W	19"/3U/D.85/250W	19"/3U/D.85/600W
6000415	6000416	6000418

CONTROL

The control thermostat is used to operate the fans/heating elements as and when necessary. It also saves on power and limits filter clogging.

The alarm thermostat opens the loop when the setpoint is overrun.

THERMOSTATS

Mount onto internal or external uprights.

Composition:

- 1 DIN rail,
- Thermostat + terminals for power supply, in the case of control thermostats, pre-wired to the contact.
- Capacitance switch 10 A at 250 VAC.

Control thermostat		Alarm thermostat	
A- ventilation	B- heater	C- low temp.*	D- high temp.*
6000388	6000389	6000390	6000391

* Dry contact: the circuit is open if the threshold is exceeded.

FAN TRAYS

Characteristics:

- 19" - 1U assembly,
- Fully wired,
- Fitted onto simple or adjustable rails.

Versions:

- 1 x 15/10th painted steel shelf,
- 2 or 4 axial fans with cords,
- 1 clear anodised aluminium profile,
- 1 on/off indicator light,
- 1 connection terminal board,
- 1 cord 2 m (3 x 1 mm²) + plug,
- 4 or 8 finger guards.

Delivery:

Fully assembled.

Standard or rear assembly, to be specified when ordering.

Tray	2 fans	4 fans
Air flow	300 m ³ /hour	600 m ³ /hour
Depth	226 mm	342 mm
Finger guards	4	8
Part no.	6000027	6000028

FAN ENCLOSURES

Characteristics:

- 19" - 2U assembly,
- Fully wired,
- No-removal interchangeable filter,
- Fitted onto simple or adjustable rails.
- Front air intake.

Versions:

- 1 x 15/10th painted steel enclosure,
- 1 plate, 2 or 4 fans,
- 2 colourless anodised aluminium profiles,
- 1 on/off indicator light,
- 1 filter on galvanised steel wire frame,
- 2 or 4 finger guards.

Delivery:

- Fully assembled.

Standard or rear assembly, to be specified when ordering.

Shell	2 fans/2U	4 fans/3U
Air flow	300 m ³ /hour	600 m ³ /hour
Depth	236 mm	352 mm
Part no.	6000029	6000030

Assembly note: Supply is provided for standard assembly. When using rear fitting, spell this out on your order.

Spare filter (unit)	A610025	A610026
---------------------	----------------	----------------

DOCUMENT HOLDER

- Impact-resistant plastic
- DIN A4 format
- Self-adhesive (can be fastened using M6 screws).

Part no.

Document holder	B014949
